

# Why add a mattress protector?

## for your comfort

Mattress pads just add another layer to your mattress and will inhibit the feel. At best, they are stain resistant not waterproof. Plastic sheets are waterproof but not breathable and sleep hot. Our mattress protector pulls moisture away from your body by dissipation. It locks the moisture away into the terry cloth cotton cover which keeps you cool and dry.

## for your health

The body loses millions of skin flakes and up to 1 liter of moisture per night. This provides a breeding ground for dust mites. Dust mites have been the determining factor in 50%-80% of asthmatics and countless cases of eczema, hay fever, and other allergic ailments. Our mattress protector is waterproof and dust mite proof.

## for your protection

Stains and tears will void the manufacturers warranty on all major mattress brands. You can't launder mattress fabrics and upholstery cleaners can prematurely break down the quilting foams. Our mattress protector is removable, machine washable, and can be washed up to 200 times backed with a 10-year warranty against the fabric breaking down.

**10  
YEAR**  
*limited warranty*
